PROFESSIONAL SUMMARY

Backend web developer experienced in building web applications and APIs using Laravel, PHP, WordPress and PostgreSQL. Comfortable working across backend development, including authentication, database-driven workflows, REST APIs, testing and deployment. Strong product design background with experience taking projects from requirements through production.

PROFESSIONAL EXPERIENCE

Web Designer / Developer

Secern Digital

(April 2024 – Present)

- Build production web applications and websites using Laravel, WordPress and REST APIs.
- Develop backend functionality, API integrations and database-driven workflows.
- Build responsive interfaces from product requirements and Figma designs.
- Work across authentication, user roles, payments and internal business workflows.
- Test, troubleshoot and deploy applications across production environments.
- Work directly with clients to translate business requirements into practical web solutions.

Product Designer

Lorem Excellentiam Services (9ijakids)

(May 2023 – January 2024)

- Conducted user and product research to identify usability and engagement gaps.
- Supported usability testing and gathered feedback to identify areas for improving the learning experience.
- Designed interactive learning interfaces and quizzes using gamification principles to improve engagement
- Worked with the product team to turn user feedback and research findings into practical improvements to existing features.

Technical Support Officer

Ikorodu Primary Healthcare

(September 2021 – March 2023)

- Provided first-level IT support to ensure smooth daily operations
- Managed immunization data and reporting through the integrated micro-planning

system.

- Improved the AEFI reporting workflow, increasing accuracy by 25% and reducing report generation time by 40%.
- Supported staff with system navigation and device setup to minimize operational delays

EDUCATION

Federal University of Technology, Akure (2017)

B.Tech. Industrial Design
